

HIMALAYAN SALT LAMP

Our salt lamp works as a natural air cleanser, found deep in million year old mines in the Himalayan Mountains, and carved by hand.

INFORMATION:

COLORED BULBS: 120V 7W E12

UL PLUG WITH DIMMER CONTROL (BUILT-IN FUSE 1A)

ELECTRICAL RATINGS: 120V AC 60HZ 40W MAX

ELECTRICAL CORD LENGTH: 62"

MAINTENANCE AND CARE:

If you notice water dripping or "sweating" while turned on, do not worry. This is condensation, and is normal for the salt lamps. To clean, switch off and unplug your lamp. Then use a paper towel or a dry cloth to wipe it down. You may want to wait for the lamp to cool down first. Please note that excess condensation can lead to water forming around or under the lamp base which can increase the risk of fire/electric shock. From time to time, use a dry cloth or soft cotton towel to pat/wipe down the outsides of the lamp and soak up the excess condensation. Always turn off and unplug the lamp before cleaning.

KNOWING YOUR LAMP:

- This lamp is made from 100% authentic Himalayan Mountains Salt Crystals and imported from Pakistan.
- A fuse controlled dimmer switch that can be used as a brightness control and to switch ON/OFF the lamp.
- Lamp shape, color, size and weight may vary due to the nature of break down process on the salts.
- Please remove shrink wrap from the salt lamp before use.

ADVANTAGES OF THE HIMALAYAN SALT LAMPS:

Salt, by its nature is "hygroscopic". It attracts water to its surface that evaporates quickly due to the small amount of heat from the bulb/light source. This is also why salt lamps tend to sweat and appear wet in humid climate. Salt lamps emit negative ions which combat positive ions that are very harmful to us and need to be neutralized. Many of these positive ions are available in dust, smoke, pollen and other contaminants in the air.

- Salt lamps cleanse & deodorize the air.
- Reduces allergy & help to ease coughing.
- Helps to ionize the room.
- Improves breathing and achieve better sleep by neutralizing the ions in the air.

Plug it in and enjoy!

- Salt lamps are known to absorb moisture from the air. Do not use the salt lamp in humid or moist areas. (bathrooms, outdoor patios, etc.).
- If you live in a humid climate your lamp may absorb too much moisture. Make sure your lamp is dry prior to plugging it in and turning it on.

IMPORTANT SAFETY INSTRUCTIONS:

1. DANGER: To reduce the risk of electric shock, remove/unplug the power cord from the outlet before cleaning, adding/replacing light bulb or moving the lamp to a new location.
2. To reduce the risk of fire/electric shock, DO NOT USE NEAR WATER. DO NOT USE IN BATHROOM. Keep the lamp away from any sort of exposure to rain or moisture.
3. For household use only.
4. DO NOT EAT. This salt lamp is not edible. Keep away from children and pets.
5. Unplug your lamp during extended period of non-use.
6. If power cord is damage, stop use immediately.
7. Keep away from direct sunlight.
8. DO NOT add or insert and foreign items into opening of lamp.
9. DO NOT jerk, pinch or sharply bend electrical cord, especially while connected to power outlet.

NOTE: Bulbs cannot be replaced.

POLARIZED PLUG

This product has a polarized plug, (one blade is wider than the other). To reduce the risk of electric shock, this plug will fit in a polarized outlet only one way. If the plug does not fully fit into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to modify the plug in any way.
